Re; NOPF from inspection 5-22-17, by William F. Sparks

The storage drum used to collect dirty Xylene, was not sealed. One of the bung plugs was not sealed in place.

We sealed it when it was noticed by your inspector. Our employees have been informed to keep the bung plugs sealed tight when not adding to the drum.

The Xylene is to be recycled by Safety-Kleen. They have scheduled to pick it up on 5-31-17.
